

Designer Spotlight

Danielle Bonello-Dunsford

Where does your design inspiration come from?

From life! It could be from nature, experiences in my childhood or travel.

In my recent getaway to Queenstown I discovered the sweetest weatherboard bungalow houses.

If you had to describe your design style in three words, what would they be?

Classic, considered and timeless.

What would be your favourite
Hepburn Hardware product?

Funnily enough, it's the Henley, which I
have never even specified in a project!
Perhaps for my own house (one day!)

Would you rather bright and bold or cozy and neutral?

Cozy and neutral all the way!

Our hardware has had the privilege of gracing some of your projects. Can you tell us what you love about our hardware?

I love the design versatility. The Bronte range works in our classic projects, beach-front projects, art deco projects - it's an all rounder!

I also love the appliance pulls, so all the hardware works together. That's really important to me.

What would you say is the next big trend?

I think curves are here to stay for quite sometime! How can you go wrong. (My joiners are shaking their heads)
